

GWAVA® Retain™ Worker

Netware

Retain no longer includes a worker install on NetWare due to Java limitations. Retain 2.x Servers will remain compatible with the Retain 2.0 NetWare worker which will be bug-fixed and maintained.

The 2.0 worker can be downloaded at:

<http://download.gwava.com/download.php?product=Retain&version=netware>

If the 2.0 worker framework will not suffice, Netware mail systems will can be dredged and archived via remote workers which are supported on Windows and Linux.
